

# Md Ibrahim Biplob

MSC APPLICANT · SOFTWARE ENGINEERING / CYBER SECURITY

**Location** Dhaka, Bangladesh

**Email** ibrahimbiplob75@gmail.com

**GitHub** ibrahimbiplob75

**Phone** +880 1571286724

**LinkedIn** ibrahimbiplob75

**Portfolio** Intellisoft team profile

## EDUCATION

### BSc in Computer Science & Engineering

2020–2025 · CGPA: 3.43 · Session: 2019–2020

National Institute of Textile Engineering & Research (NITER), University of Dhaka

## TECHNICAL PREPARATION

**Programming:** JavaScript, TypeScript, PHP; C, C++, Java, and Python from my existing technical background.

**Software & databases:** React, Next.js, Node.js, Express, NestJS, Laravel, MongoDB, PostgreSQL, Prisma.

**Engineering practice:** REST APIs, relational data modelling, role-based access control, Git, Linux, Docker, and deployment configuration.

## LEADERSHIP & RECOGNITION

- Campus Ambassador — Creative IT Institute; received Best Campus Ambassador recognition.
- Gold Award — Achieving Sustainable Development Goals (SDGs), Univ.

## COMPETITIVE PROGRAMMING & ACADEMIC ENGAGEMENT

- ICPC Asia Dhaka Regional Contest 2024 — ranked 221st.
- Problem-solving practice on Codeforces, LeetCode, and HackerRank.
- Senior Executive — NITER Computer Club.
- University Team Leader — ICT Olympiad Bangladesh.

## ACADEMIC PROFILE

CSE graduate with professional software development experience at RETINA and technical leadership responsibilities at Intellisoft. My progression from undergraduate study and competitive programming to full-stack application development motivates Msc study in Europe, particularly in Software Engineering and Cyber Security.

## PROFESSIONAL EXPERIENCE

### Software Developer · RETINA

#### Current role

- Contribute to LMS and ERP systems, including feature planning, software development, bug fixing, quality assurance, and enhancements to existing applications.
- Work with React interfaces and Node.js/Express APIs backed by MongoDB for academic and administrative workflows.

### Lead Software Engineer · Intellisoft

#### Current role · Own IT company

- Lead software development and technical decisions, with responsibilities spanning project development and deployment.
- Develop company web applications using React, Express, and MongoDB, with administrative workflows for projects, team profiles, and ongoing work.

## SELECTED TECHNICAL PROJECTS

### 1 Restaurant operations platform — access control & data modelling

Admin Panel · Client Website

Next.js · NestJS · PostgreSQL · Prisma

- Contributed to a multi-restaurant application covering orders, billing, inventory, and administrative workflows.
- The codebase demonstrates relational modelling, role/permission checks, request-scoped tenant context, and audit logs; accompanying tests exercise tenant and outlet boundaries.
- Relevant to further study in software architecture, database systems, and application security.

### 2 Intellisoft task platform — serverless application design

Vue · Cloudflare Workers · D1 · Prisma

- Contributed to task assignment, status tracking, and project workflows backed by a serverless API and relational persistence.
- Scheduled handlers and email services support due-date reminders; calendar queries aggregate task completion data.

### 3 Care Nest — E-commerce & Application Integration

carenest.shop

Next.js · Express · MongoDB · Redis / BullMQ

- Developed across storefront, administrative, and backend components with variant and stock validation.
- The project includes background publishing jobs and deployment scripts, providing practical context for studying asynchronous systems and software maintenance.

### 4 Smash — E-commerce & Order Management

smashstorebd.vercel.app

React · TypeScript · Express · MongoDB

Developed an e-commerce application with checkout, order status updates, inventory tracking, low-stock warnings, and order email workflows.

### 5 **Gardashlar — Member Contributions & Fund Tracking**

frontend-gardshlar.vercel.app

React · Express · MongoDB

Developed member deposit, contribution, and investment tracking with authenticated dashboards and fund summaries.

### 6 **Bepari — Hardware & Sanitary Shop Management**

bepari-client-site.vercel.app

Built a multi-user shop management platform with product management, stock and receipt tracking, and customer-facing pages.

### 7 **RMC Rotaract — Blood Management System**

rmcrotaract.org

Developed a blood management system for a medical college, with donor and blood-request workflows, stock monitoring, and role-based access.

### 8 **Dr Tawhid Academy — Medical Coaching Management**

drtawhidacademy.com

Medical coaching management system.

## RESEARCH INTERESTS

Software architecture and maintainability; secure web applications and access control; database consistency and tenant isolation; cloud-based software systems. These are intended areas of postgraduate study.
